PART VIII

MUNICIPAL REVENUES, EXPENDITURES, AND PUBLIC PROPERTIES: 1913

88489°—VOL 2—15——25

PART VIII.

MUNICIPAL REVENUES, EXPENDITURES, AND PUBLIC PROPERTIES: 1913.

INTRODUCTION.

Scope of Part VIII.—The tables contained in Part VIII of this report set forth the total and per capita receipts and payments of municipalities during a fiscal period closing between July 1, 1912, and June 30, 1913, inclusive, and the value of their salable possessions at the close of such fiscal period.

ACCOUNTING TERMINOLOGY.

The necessity for a definite basis of classification.—By the requirements of law census statistics are based upon official records. Being derived in large part from the accounts and reports of accounting officers, such as comptrollers, treasurers, etc., the statistics of Part VIII are necessarily classified exhibits of the financial transactions of the counties or of what are called receipts and payments of cash. In the absence of uniformity in the use of financial terms in the reports of such officials, the Bureau of the Census has formulated a definite and standard use of terms. The present significance of these terms, which has grown out of the early and tentative meaning assigned them, is based upon the usage of the best writers on commercial accounting, modified to meet the special requirements of governmental accounts.

As an aid to the intelligent use of the data contained in Part VIII, there are herewith given brief definitions of such terms as were employed by the Bureau of the Census in the collection and compilation of the data.

Primary classification of receipts.—For the statistics herein presented the receipts recorded in local accounts and reports have been arranged in two primary classes, called revenue receipts and nonrevenue receipts.

Revenue receipts.—The term "revenue receipts" is here applied to the moneys and other wealth received by governmental units for governmental purposes, which increase their aggregate assets without increasing their debt liabilities. In Part VIII there have been tabulated as revenue receipts all amounts recorded in local revenue accounts, less amounts which have been returned or are to be returned by reason of error or otherwise. The tables of this volume present the revenue receipts of incorporated places having a population of 2,500 or over, as classified by source from which derived. So classified, revenue receipts fall into fourteen classes, each of which is specifically mentioned and described in the paragraphs which follow.

Taxes.—Taxes are enforced proportional contributions of wealth levied and collected in the general interest of a community, from individuals and corporations, by virtue of the sovereignty of the Nation or state, for the support of governments and for the defrayal of all expenses growing out of the public needs, which are levied without reference to the special benefits which the contributors may severally derive from the public purposes for which the taxes are required.

General property taxes.—A general property tax is a tax levied at the same rate upon the greater portion of the property within the territory subject to the taxing power. A similar tax levied upon a specified class of property within that territory is called a *special levy of the general property tax;* and if levied upon a specified portion of that territory, it is called a *local levy of the general property tax.* A general or a special levy which is applicable for a specified purpose is further designated as a *specific levy of the general property tax.*

Special property taxes.—"Special property taxes" is the designation here applied to those direct taxes levied upon property which are assessed, levied, and collected by methods not generally employed in the case of real property. As such taxes the Bureau of

excess above the value of specified investments; and taxes upon life insurance corporations assessed upon the basis of the valuations of their policies. Special property taxes also include all taxes levied upon mortgages at the time of their execution or entry of public record, and taxes on investments, choses in action, bonds and notes for specified periods of time, and all specific taxes upon property, taxes upon horses, mules, and other animals in specified amount per head, taxes upon grain in specified amount per bushel, and taxes upon ships in specified amount per ton of capacity.

Poll and occupation taxes.—As poll and occupation taxes, the Bureau of the Census includes all exactions by the government from private individuals which are levied without regard to the property or income of the taxpayer.

These taxes comprise (1) so-called poll or capitation taxes, whether levied in special amounts upon all males of specified ages or levied as *quasi* property taxes based upon an arbitrary valuation of polls; (2) all so-called poll taxes graded in amounts according to occupations; and (3) all exactions of personal service, as work upon the highways or elsewhere, whether classed in local statutes as taxes or otherwise. Poll or personal taxes graded according to occupation may with propriety be called occupation poll taxes. These are to be distinguished from business taxes, since they are primarily levied upon persons and not upon the business or business activity by which the taxpayer secures an income.

Special assessments.—Special assessments are proportional contributions of wealth levied against land and collected from its owners and occupants to defray the costs of specified public improvements made, or of specified public services undertaken, in the interest of the general public. Special assessments, like taxes, are levied and collected under the sovereign powers of the state.

Business and income taxes.—These are taxes collected from persons, natural or corporate, by reason of their business or income, where such collection is not associated with the granting of a license or permit to carry on a particular business. Business taxes as here defined may be levied with or without reference to benefits conferred upon or enjoyed by the taxpayer. As such taxes the Bureau of the Census includes all taxes levied upon railroad, insurance, and express companies, and all other corporations or individuals in proportion to their gross receipts.

Business license taxes.—Business license taxes are taxes exacted in connection with the issue of a written instrument called a license or permit, which authorizes the licensee to engage in some specified business or business activity. In this report the business license taxes appear under two headings, "Liquor licenses and other imposts" and "Other business licenses."

Nonbusiness license taxes.—Nonbusiness license taxes are taxes other than upon business that are exacted primarily for purposes of regulation, and are collected in connection with the issue of so-called licenses or permits, and are always levied with reference to measurable or assumed measurable benefits conferred upon or enjoyed by the taxpayers. The receipts from these taxes include license taxes paid by persons granted (1) dog licenses, (2) general licenses, and (3) permits.

In the first class, or that of *license taxes on dogs*, are included all taxes which are collected from the owners of dogs in connection with the issue of licenses or permits to keep such animals for a specified period of time, generally a year.

In the second class, or that of *general license taxes*, are included all nonbusiness license taxes that are collected in connection with the issuance of licenses or permits other than for keeping dogs, which are granted for a specified period of time, as a year, month, or day. Among taxes of this kind are those collected for vehicles, as automobiles, bicycles, etc., irrespective of whether these vehicles are kept for business or pleasure.

In the third class, or that of *permit taxes*, are included all nonbusiness taxes that are collected in connection with granting of so-called licenses or permits which authorize specified acts or transactions, as marriage licenses or permits, and departmental permits.

Fines, forfeits, and escheats.—The terms "fines," "forfeits," and "escheats" are defined as follows: Fines are amounts of wealth exacted from individuals, firms, and corporations, under the sovereign power of inflicting punishment for violation of law; forfeits are amounts accruing to governments in accordance with the terms of contracts as penalties for nonobservance of such contracts; and escheats are amounts of money received from the disposal of properties the owners of which can not be ascertained or located.

Highway privileges.—These receipts are amounts of money received by a civil division as compensation for special privileges in, upon, under, or over the public highways granted to particular individuals and corporations beyond the privileges enjoyed by other individuals and corporations.

Interest and rents.—Interest receipts represent all interest received by the general treasury and by the separate funds except (1) receipts of interest on taxes and special assessments, which are included with the receipts from original levies reported under those titles; and (2) accrued interest on original loans, which is included with nonrevenue receipts as from counterbalancing transactions. The receipts included under this heading as rents are those derived from rents of real property belonging to investment, sinking, and public trust funds and from other real property owned by the municipalities not set apart for the use of any particular department.

Subventions and grants.—These receipts are gratuitous contributions made by one government to another, the term *subvention* being applied as the designation of such contributions as are received by a civil division with certain prescribed conditions, while the term *grants* is applied to those contributions which are made without the prior establishment of conditions.

Donations and gifts.—These receipts are gratuitous contributions made by private individuals and corporations to governments. The Bureau of the Census uses the term *donations* in referring to those contributions from private sources which are for the establishment or maintenance of almshouses, hospitals, infirmaries, libraries, and kindred institutions, and applies the designation *gifts* to all other contributions by private individuals and corporations to governments. Related to gifts are pension assessments, which are amounts of money collected from governmental employees toward the payment of pensions and the maintenance of pension funds in the interests of the classes of employees contributing.

Earnings of general departments, and miscellaneous.—These receipts include fees and charges received by governments for services performed by their general departments, rents of real property controlled by their departments, amounts received from sales of materials, and occasionally amounts from miscellaneous sources.

Earnings of public service enterprises.—These are the amounts received from the fees, charges, rates, tolls, and manufactures of those departments of government which are organized for the purpose of providing the public with some utility with the idea of receiving compensation therefor.

Nonrevenue receipts.—The term "nonrevenue receipts" is applied to all receipts of a civil division other than its revenue receipts as previously defined. The nonrevenue receipts of a fiscal year of any civil division comprise all receipts recorded during the year from (1) sales of investments and of supplies which have been purchased for sale; (2) issue of debt obligations and transactions which increase the indebtedness without the issue of formal debt obligations; (3) trust and agency transactions; (4) transactions offsetting outlays, as the collection of insurance to be applied to the reconstruction of destroyed property, refunds of erroneous payments, and receipts in error; and (5) such counterbalancing transactions as transfers between the funds or divisions of the governmental unit.

Primary classification of payments.—In the statistics of this report the payments recorded in local accounts and reports are arranged in two primary classes, called governmental cost payments and nongovernmental cost payments.

Governmental cost payments.—The term "governmental cost payments" is applied to the payments by a civil division for its governmental costs, or for its expenses, interest, and outlays, less amounts which have been returned or are to be returned by reason of error or otherwise.

Classification of governmental costs.—The costs of government of a civil division for any fiscal year are the accrued costs, paid and payable, for the services employed, property constructed, purchased, or rented, public improvements constructed or otherwise acquired, materials utilized, and interest on borrowed moneys, which are incurred for administering the government, protecting person, property, and health, providing social necessities and conveniences, caring for the dependent and delinquent classes, bettering social conditions, performing other services and carrying on other activities for which the civil division has authority. These costs are separable into three principal groups—payments for expenses, payments for interest, and payments for outlays.

Expenses.—In this class of governmental cost payments this report includes all payments for expenses which are (1) the costs, other than interest, from which no permanent or subsequently convertible value is received, including the costs of services employed, property rented, and materials consumed in the maintenance and operation of the government, the conduct of governmental undertakings, and the management of trusts; and (2) losses resulting from defalcation, bank failures, and other causes. Payments for expenses are divided into two principal classes—payments for the expenses of general departments and payments for the expenses of public service enterprises. The first class of payments is subdivided into those for the expenses of the principal divisions of the general departmental service.

Interest.—Interest is the designation of the accrued costs, paid or payable, incurred for the use of credit capital.

Outlays.—The term "outlays" is here applied to payments for land and other properties and public improvements, more or less permanent in character, which are constructed or acquired by civil divisions for use in the exercise of their governmental functions or in connection with the business undertaken by them. Payments for outlays offset by receipts have been deducted from the outlay payments and included among the payments for nongovernmental costs as payments in counterbalancing transactions.

Nongovernmental cost payments.—The term "nongovernmental cost payments" is here applied to all payments of civil divisions other than their payments for expenses, interest, and outlays. The payments are arranged in five classes which are the converse of the five classes of nonrevenue receipts of which mention has previously been made.

Public properties.—Public properties is the designation applied by the Bureau of the Census in referring to land owned and used by a civil division for governmental purposes, to buildings and other more or less permanent structures on such land (other than such permanent structures as have a value in community use but not in exchange, as highway paving, sewers, etc.), and to furniture, tools, apparatus, and other

equipment having a life in service of more than a year.

Assets of funds.—A fund, as the term is employed in governmental accounting, is a sum of money, the principal or interest or both principal and interest of which is appropriated or devoted to a specific object. The *assets* of a fund are the cash and securities convertible into cash which are held by the fund for the accomplishment of its purpose.

Service transfers.—As *service transfer receipts* the Bureau of the Census classifies (1) the receipts by or for public service enterprises as compensation for the public utilities such as water, gas, and electric current furnished by them for city uses; and (2) certain receipts by one governmental division, fund, department, or office, as compensation for the service performed and the materials and other equivalents of cost furnished by it for another governmental division, fund, department, or office, or for a municipal enterprise, and the payments by or for a division, enterprise, department, fund, or account for which the services are performed and the materials and other equivalents of cash are furnished. *Service transfer payments* are the converse of the receipts above described.

For cities having a population of over 30,000 service transfer receipts and payments are included with receipts from and payments to the public, while for the remaining cities such receipts and payments have been eliminated.

DESCRIPTION OF GENERAL TABLES.

Number and character of general tables.—The statistics of this report are presented in eleven tables, nine of which relate to municipal receipts and payments during the year 1913, while two set forth the value of municipal properties and of assets of municipal funds, other than sinking funds, at the close of that year. Tables 1, 3, 5, 7, 8, and 10 give the municipal figures in totals by states, while Tables 2, 4, 6, 9, and 11 give the data in detail by incorporated places having a population of 2,500 and over.

For ten cities—Newark, Pittsburgh, Buffalo, Cleveland, Cincinnati, Detroit, Chicago, Milwaukee, Minneapolis, and Los Angeles—the data shown in the tables of this bulletin differ in many particulars from those shown for these cities in the report of this bureau entitled "Statistics of Cities having a Population of 30,000 and over: 1913." These differences are due to the inclusion in the report mentioned of a part of the data for the counties in which these cities are located, for the purpose of making their statistics more nearly comparable with those for the remaining cities having over 300,000 inhabitants; such cities being so organized that they have both city and county functions.

Tables 1 and 2.

Summary of all receipts and payments.—Tables 1 and 2 present, for the municipalities covered by this bulletin, a summary, by states and by incorporated places, of their receipts classified as revenue and nonrevenue, and of their payments classified as governmental cost and nongovernmental cost. In the column of receipts headed "Revenue" are summarized all amounts that are recorded in the books of the municipalities as having been received on revenue account other than receipts in error and accrued interest received on the original issue of debt obligations. In the second column of receipts are summarized all other receipts under the heading "Nonrevenue." In the column of payments headed "Governmental cost" are summarized all amounts recorded in the books of the municipalities as having been paid on account of expenses, interest, and outlays, other than payments in error, payments of accrued interest on investments purchased, and payments for outlays balanced by amounts credited in outlay accounts. In the second column of payments are summarized all other payments under the heading "Nongovernmental cost." The receipts and payments summarized in Tables 1 and 2 are given in detail in Tables 4, 6, and 9.

Tables 3 and 4.

Revenue receipts of incorporated places.—In Tables 3 and 4 the revenue receipts, total and per capita, of incorporated places are presented, by states and by incorporated places, under fifteen different headings, the first fourteen of which show the revenue receipts other than those from public service enterprises. The significance of each of these fourteen headings which are employed as designations of the different classes of revenues will be found on pages 9 to 11 of this bulletin. The last column of the tables shows the total of all revenues received by or for public service enterprises.

A number of the reports for incorporated places received by the bureau were defective in their classification, revenues of one kind being included with those of another kind. Many of these defects have been remedied through correspondence with city officials, but it has not been possible to eliminate all of them. The principal defects of this character and a few other kinds that could not be eliminated are pointed out in the paragraphs which follow, and should be taken into account when using the figures of the incorporated places or the state totals affected thereby. These paragraphs also direct attention to a number of interesting features shown by the tables.

ALABAMA.

Two cities—Birmingham and Mobile—reported no receipts from the street tax which municipalities are empowered to levy. For two cities—Eufaula and Greenville—the amounts of such revenue collected were not reported separately.

Receipts from other business licenses, fines, forfeits, and escheats, subventions and grants, and depart-

mental earnings were reported by all cities and in fairly uniform amounts.

The receipts reported as from donations and gifts were, for the most part, contributions for schools.

ARIZONA.

The relatively large per capita receipts from general property taxes shown for Phoenix and Prescott are due partly to the inclusion of high school taxes and partly to the necessity of meeting large outlays for highways, sewers, water-supply and irrigation systems in Phoenix and for a water-supply system in Prescott.

Five of the nine cities reported receipts from poll taxes. If any of the other cities collected such taxes, the amounts are included in some other item of receipts.

For Bisbee the $9,000 in the column headed "Highway privileges" was derived from the franchise of the Bisbee and Warren Street Railway.

It was not possible to separate the transactions of the schools in Bisbee, Tucson, Clifton, Douglas, and Yuma from those of the other schools in the respective counties, as in the case of Globe and Nogales. For the first five cities, therefore, no subventions for schools were reported. Phoenix and Prescott were the only cities maintaining high schools in addition to the schools supplied by the counties.

All cities except Clifton and Yuma reported receipts from public service enterprises. Phoenix reported $135,672 as receipts from its water department, $3,056 from the sale of water for irrigation purposes, and $293 from public markets.

ARKANSAS.

Newport reported the highest receipts per capita from liquor licenses of all incorporated places in the state. No explanation for this is at hand, although the per capita receipt, $5.16, is nearly twice that of Hot Springs, which had the next highest per capita revenue from this source.

The amount shown for Texarkana in the column headed "Subventions and grants" is comparatively large, the per capita receipt being $4.43, but the school system supported by this city is an extensive one and the amount of state aid for education is naturally large.

For Argenta, Hot Springs, and Jonesboro the receipts per capita from fines, forfeits, and escheats were in excess of $1. The major portion of such receipts shown for these cities consisted of court fines.

Conway reported no receipts from other business licenses.

CALIFORNIA.

A considerable number of the cities of this state reported per capita receipts from special assessments far in excess of the average for the state, $6.70. Those showing the largest per capita receipts are Ocean Park, $81.41; South Pasadena, $66.12; Corona, $55.31; Redondo Beach, $34.73; Alhambra, $31.28; Glendale, $27.47; and Richmond, $27.46. In all of these places the outlay payments for public improvements as shown in Table 6 are correspondingly large.

According to the reports submitted, very few cities availed themselves of the privilege of levying a street poll tax.

Emeryville and Ocean Park show no receipts from fines, forfeits, and escheats. If there were revenues from these sources, they are included under some other heading.

San Leandro and Ocean Park do not report receipts from earnings of general departments.

COLORADO.

Eleven of the 27 cities of the state reported separately the amount of poll taxes collected. In the case of the remaining cities, unless the poll taxes were commuted to street work, the amounts of such taxes were included with some other class of receipts in the reports received.

Receipts from nonbusiness license taxes, which in this state consisted chiefly of receipts from automobile and dog licenses, were not reported separately by Cripple Creek or Victor. It is probable that these cities derived revenues from such sources but included the receipts with other items shown under some other caption.

The cities of Monte Vista and Sterling did not report separately receipts from fines, forfeits, and escheats. If revenues from such sources were collected by these cities, the receipts were probably included with other items.

No subventions are shown for Cripple Creek, Florence, or Victor. In the case of Florence subventions from the county and state for school purposes were included with receipts from general property taxes, and no segregation was attempted on account of lack of data. Cripple Creek and Victor form a union school district, and because it was not possible to make a segregation of their accounts no school data for these cities are shown. The subventions reported by Greeley and Sterling were those received from the counties for aid in improving streets. No school data were returned for these cities.

The donation reported by Lamar was for the public library.

CONNECTICUT.

In Connecticut a number of the incorporated places, which in other localities would be called townships, receive the name of "towns," although they include within their limits towns in the more widely accepted meaning of the word. The cities of the state are also situated within towns, with which they are in many instances coextensive. When the city here reported is not coextensive with the town in which it is located, the population of the city appears in italics and a reference note explains that it is included elsewhere in the column in the population of the town within which the city is situated.

In the column headed "General property taxes" an unusually large per capita is shown for Greenwich town, Milford town, and New Canaan town. Back taxes amounting to $28,733 for Greenwich town and $15,690 for New Canaan town are included in the amounts of general property taxes shown as received by these cities. The small amount reported for Bethel is due to the fact that no levy was made that year, levies being made only once in every two years.

Suffield town and West Hartford town reported large receipts from special property taxes. These were taxes on bank and insurance stock owned by residents.

Ansonia and Greenwich show high rates for special assessments. These were for sewers and street paving.

Receipts from nonbusiness license taxes, such as dog taxes, were not reported separately for a number of towns and cities. It is probable that receipts from this source were included with the earnings of general departments.

The large per capita subventions shown for Middletown and Wethersfield town were for schools. Included in the column headed "Subventions" are the receipts from the state or town for highway and school aid. For Bethel, Danielson, Fairfield town, Norwalk, Putnam, Rockville, Stafford Springs, Stamford, and Torrington, the amounts shown in this column are subventions for highway purposes only, as no school transactions for these places were reported.

In the column headed "Donations and gifts" the places showing the highest per capita receipts are Naugatuck, which received $20,000 from gifts and popular subscriptions; South Norwalk, to whose library $13,300 was contributed; and Winchester town, which received a gift of $25,000 to create a sinking fund for the redemption of the town debt.

Norwich shows a per capita receipt of $11.64 in the column headed "Earnings of public service enterprises." Of the total earnings, $191,164 represents receipts from the electric light plant, and $45,743 was derived from the water-supply system. The earnings of the public service enterprises conducted by South Norwalk were $10.57 per capita. The electric light plant yielded $61,133 of the total amount.

DELAWARE.

The receipts of the city of Wilmington from special property taxes were derived from a tax of $1 per head on horses and mules. If such taxes were collected in the other cities reported, they are included in the amounts reported as received from general property taxes.

FLORIDA.

The only report secured for Miami was one which covered a period of two years, and the amounts shown in Tables 4 and 6 are one-half of the reported receipts and expenditures.

The largest per capita revenue receipts are shown for the town of St. Petersburg. The receipts of this town from general property taxes and also from special assessments are far above the average for the state.

The town of Orlando shows the highest per capita receipts from general property taxes, this amount being $21.22, while the average for the state is $8.30.

A number of cities did not report receipts from nonbusiness licenses, such as dog and motorcycle licenses.

No receipts from subventions and grants are shown for any of the municipalities. This is explained by the fact that the schools are under the jurisdiction of the counties and all subventions from the state for educational purposes were received by the counties and not by municipalities.

GEORGIA.

Seven of the 44 cities in the state having a population of over 2,500 in 1900 reported receipts from business taxes which were principally taxes levied on insurance premiums. If other cities than these derived revenues from this source, the receipts are included with items shown under some other caption.

Three cities—Monroe, Statesboro, and Toccoa—did not report separately receipts from other business licenses, and several cities did not report the amount of nonbusiness license taxes collected. It is probable that for some of these cities receipts from such sources are included with other items shown in the column headed "Earnings of general departments and miscellaneous." The receipts from nonbusiness license taxes were from dog licenses, which were not collected in all cities of the state.

Of the cities having a population of less than 30,000, only Brunswick and Columbus reported receipts from highway privileges. In the former city the amount reported was for the lease of street ends; that for the latter city was for the rent of a bridge by a railway company.

Subventions were not reported separately for Barnesville, East Point, Fort Valley, Sandersville, Toccoa, or Waynesboro. In the case of the first five cities mentioned, receipts from this source are probably included with those of another class; in the case of Waynesboro, no school data are included in the tables.

Five cities—Augusta, Brunswick, Columbus, Dalton, and Hawkinsville—reported receipts from donations. The amount reported for Augusta consisted of $1,000, donation for the Barrett Memorial, and $2,250, pension fund assessments of the police and fire departments. The amounts reported for the other cities were contributions for schools.

The amount shown for the city of Cedartown as earnings of public service enterprises includes $3,500, which was turned over to the city by the city water and light department. The total receipts of the water and lighting enterprises were not reported.

IDAHO.

Only five of the 12 cities in the state reported receipts from poll taxes. While the levying of such taxes was optional with the cities, it may be that in some instances revenues derived from this source were included with receipts shown under some other caption.

ILLINOIS.

The highest per capita revenue receipts are shown for the town of Winnetka, being $60.41 as against the average of $23.90 for the state. Unusually large receipts from special assessments and from earnings of public service enterprises were reported for this city. The majority of the cities reported receipts from business taxes, which consisted of the taxes on the gross receipts of foreign fire insurance companies.

Morgan Park, Murphysboro, North Chicago, Pontiac, Rock Falls, Sterling, and Winnetka did not report receipts from fines, forfeits, and escheats. If any such revenues were received, they are included under some other heading.

Five of the municipalities—Downers Grove, Hoopeston, Lake Forest, Lockport, and Marseilles—did not report any receipts from subventions and grants. As all incorporated places receive state aid for educational purposes, it is evident that the amounts received for this purpose by these places are included elsewhere.

INDIANA.

The total and per capita receipts for the city of Gary were comparatively large. The data secured from this city were for the calendar year 1912, but the per capita receipts were computed on the population enumerated as of April 15, 1910, as no later figures were available, and, on account of the city's rapid growth, were larger than would be the true per capita receipts computed on the population of December 31, 1912.

Several cities in the state did not report receipts from poll taxes. In many instances revenues derived from this source were doubtless included with receipts from general property taxes.

Several cities reported no receipts from nonbusiness license taxes, such as dog taxes, nor from fines, forfeits, and escheats. It is probable that receipts from such sources were included with other items shown in the column headed "Earnings of general departments and miscellaneous."

The two cities of Columbus and Madison did not report separately receipts from subventions, but probably such receipts are included with other items shown under the caption "Earnings of general departments and miscellaneous."

The receipts classified as donations and gifts were principally gifts for library and park purposes.

Princeton reported payments for a cemetery, classified as a public service enterprise, but no receipts from this source. The receipts, if any, were probably included with earnings of general departments.

IOWA.

The statistics for the state of Iowa were compiled from reports sent to this bureau by the municipal officials and from the 1913 annual report of municipal accounts published by the auditor of the state of Iowa.

Very large receipts from public service enterprises are shown for Independence and Newton. These were derived almost entirely from electric light and water-supply systems. The electric light plant of Newton, according to the state report of municipal accounts, returned receipts of $55,594. Its valuation is given as $55,500, and the cost of maintenance for the year, $46,518, besides an outlay of $8,034. Excluding the outlay, this gives an excess of receipts over expenditures of $3.71 per capita for the year. The water-supply system of this town also shows a large excess of receipts over expenditures, amounting to $1.95 per capita.

No receipts were reported from the cemetery for Eagle Grove, nor from the markets and scales for Oskaloosa, although payments for these enterprises are shown in Table 6.

KANSAS.

Several cities did not report separately receipts from business licenses, from nonbusiness license taxes, nor from fines, forfeits, and escheats. If these cities derived revenues from such sources, the receipts were doubtless included with other items shown under the caption "Earnings of general departments and miscellaneous."

Eleven cities reported receipts classified as from donations and gifts. Such receipts consisted of donations for libraries, parks, etc.

KENTUCKY.

For Maysville receipts from fines are probably included in the amounts shown in the column headed "Earnings of general departments."

LOUISIANA.

New Orleans, Kentwood, Minden, Natchitoches, and Winnfield show receipts from poll taxes. In the case of New Orleans such receipts are accounted for by the fact that the city has parish functions. The receipts shown in the four other cities are probably from commutation road taxes.

Shreveport and Alexandria reported receipts from business taxes collected from foreign insurance companies.

New Orleans and Lake Charles show receipts from subventions. These were received for educational purposes.

The per capita earnings of public service enterprises for Monroe are far in excess of those reported for other municipalities. Monroe owns a street railway in addition to such other enterprises as are usually operated by municipalities.

MAINE.

The numbers appearing in the population column for Brunswick, Fairfield, Presque Isle, and Rumford Falls are printed in italics, for the reason that the population of these villages is included elsewhere in that of the towns in which they are located.

Eden town shows the largest per capita receipts from general property taxes. The payments shown in Table 6 are correspondingly large for protection to person and property, highways, and schools.

The majority of the cities reported receipts from a tax on railroads and telephone companies, classified as a business tax.

The receipts classified as from nonbusiness license taxes were derived in most instances from permits, such as sewer permits.

No subventions are shown for the four villages mentioned above, the town being the unit which administers the financial transactions of schools.

The largest donations were reported by Bangor and Fort Fairfield town. Both donations were for public libraries.

No receipts from the cemeteries conducted as public service enterprises, for which payments are shown in Table 6, were reported for Bridgton town, Calais, Camden town, Ellsworth, Houlton town, Norway town, Old Town, Presque Isle town, and Winslow town.

MARYLAND.

Of the total receipts of the 15 incorporated places in Maryland, those of Baltimore represent 94.3 per cent. This city was the only one which reported receipts from special property taxes. This revenue was derived from the annual franchise tax on deposits of savings banks collected by the state and the counties containing such banks. Baltimore shared in such revenue, for the reason that in this city all the county functions are merged with those of the city.

The amount reported for Cumberland in the column headed "Special assessments and charges for outlays" is comparatively large. A considerable portion of this amount was received from the Baltimore & Ohio Railway on account of street improvement. The amount of outlays shown for this city in Table 6 is correspondingly large.

For Cumberland and Hagerstown large receipts from liquor licenses were reported; and for the former city large receipts from fines also.

MASSACHUSETTS.

New Bedford is the only city which reported receipts from business taxes. The amount shown represents a tax on ships engaged in foreign trade.

Receipts from special property taxes, consisting principally of bank and corporation taxes, are shown for all except six of the cities and towns. If these places received revenues from such sources, they did not report them separately.

A considerable number of municipalities did not report receipts from fines, forfeits, and escheats. It is probable that there were such receipts but that they were retained as fees in compensation for services rendered.

Revere and Whitman do not show any receipts from subventions and grants. Since all school districts receive state aid, the only explanation is that the amount so received is, in this instance, included under some other heading.

Three cities show noticeably large per capita receipts in the column headed "Earnings of general departments and miscellaneous." In Concord the largest item was a receipt from tuition; in Natick, from hospital earnings; and in South Hadley, from the state highway department as reimbursement for work on state highways.

MICHIGAN.

The receipts from special property taxes shown for the city of Detroit represent revenue derived from the levy of a specific tonnage tax on vessels engaged in carrying passengers and freight.

Only two cities—Negaunee and Bessemer—reported receipts from poll taxes. If other cities in the state derived revenues from this source, the receipts were probably included with those from general property taxes.

Lansing was the only city which reported receipts from business taxes, and these receipts were derived from a tax levied on the gross earnings of a power company.

Several cities did not report separately receipts from other business licenses, nonbusiness license taxes, or from fines, forfeits, and escheats, but doubtless in some instances receipts from such sources are included with other items shown under the caption "Earnings of general departments."

MINNESOTA.

The cities of Hibbing, Virginia, Chisholm, Ely, and Eveleth show unusually high per capita receipts from general property taxes. In each case the assessed valuation upon which the school taxes were levied was very much larger than the city valuation, and it is probable that the school districts covered larger territory than the city. The per capita figures, being in all cases based on the city population alone, are consequently higher.

The special property taxes reported for Minnesota cities were of two kinds—mortgage taxes and a specific tax on grain in elevators. Only a few of the cities reported these as special property taxes; in others it is evident that they have been included with the general property taxes.

The law requires every male inhabitant between the ages of 21 and 50 years, except paupers, etc., to be assessed not less than one nor more than four days' labor each year. Only six cities show receipts from poll taxes, and three of those show less than $100 each.

Not all of the cities show receipts from business taxes. The law provides that 2 per cent of the gross premiums received by foreign fire insurance companies is to be paid to cities and villages where collected unless there is a duly organized fireman's relief association, in which case it is paid to the latter. This insurance tax is the only business tax reported by any of the cities of this state. It is possible that cities other than those showing such tax receipts derived revenue from this source, but included the amounts collected with receipts from general property taxes.

East Grand Forks shows high per capita receipts from liquor licenses. The financial statement for that city shows 62 licenses issued, averaging about $800 per license.

MISSISSIPPI.

Only three cities reported receipts from donations and gifts. For Hattiesburg the amount reported represents a gift from the Commercial Club to the water fund; for Laurel, school contributions; and for Clarksdale, a donation to the Carnegie Library.

Two cities reported no receipts from earnings of departments, which is unusual.

Clarksdale reported the highest per capita receipts from public service enterprises. A very large electric light plant is operated by this city. For Vicksburg no receipts from its water-supply system are shown, though payments for such an enterprise appear in Table 6. The reason for this is that the waterworks were in course of installation.

MISSOURI.

St. Louis is the only city that shows a receipt from special property taxes. This amount represents receipts from steamboat owners, manufacturers, and merchants.

A large number of cities apparently did not avail themselves of the privilege of levying a poll tax.

Six cities, including Jefferson City, do not show any receipts from fines, forfeits, and escheats. It is probable that there were revenues from these sources. They may have been retained as fees for services rendered or included in receipts of some other class.

Excelsior Springs shows no receipts from subventions and grants, due to the fact that no report of the financial transactions of the schools of this city was obtained.

For Carterville and Charleston no receipts are shown in the column headed "Earnings of public service enterprises," although Table 6 shows small payments for a cemetery and a water-supply system, respectively, and Table 11 shows the valuations of these properties.

MONTANA.

Six of the 14 cities of the state did not report receipts from business taxes, which were apportionments of the state fire insurance tax. If any of the cities not reporting derived revenues from this source, the receipts were probably included under some other caption.

NEBRASKA.

A number of the cities do not show receipts from poll taxes. In cities levying a poll tax, the payment may be in cash or commuted to labor on streets.

The amounts shown in the column headed "Business taxes" represent what are termed locally "occupation taxes." It is probable that in cities where they are not reported, they are included in the column headed "Other business licenses."

North Platte shows no receipts from fines, forfeits, and escheats. Such revenues were doubtless received but not reported separately.

Eight of the total number of cities do not show receipts from subventions and grants. Each of these cities received state aid for schools, and the amounts are probably included with receipts from general property taxes.

NEW HAMPSHIRE.

Receipts from special property taxes, consisting of taxes on savings banks, were not reported by the cities of Rochester and Littleton, and the town of Walpole. If these places collected such taxes, the receipts are doubtless included in the amounts shown under the caption "General property taxes."

Thirteen of the 27 cities and towns in the state did not report separately receipts from poll taxes, but included the revenue derived from this source with the receipts from general property taxes.

Business taxes, consisting of taxes on insurance companies and building and loan associations, were reported by 20 of the 27 cities and towns.

The per capita receipts from general property taxes shown for the town of Walpole are comparatively large, due to the settlement of taxes which had been in litigation.

A few of the cities and towns did not report separately receipts from nonbusiness license taxes or from fines, forfeits, and escheats, but probably included revenues derived from these sources with other items shown under the caption "Earnings of general departments and miscellaneous."

Littleton village, Rochester, and Walpole town did not report separately the amounts of subventions for schools received by them from the state.

Berlin and Lancaster town reported no receipts from cemeteries, conducted as public service enterprises, for which payments are shown in Table 6, and valuations in Table 11.

NEW JERSEY.

Edgewater reported the highest per capita receipts from general property taxes and special assessments. It is noted that the same city reported the second highest per capita receipts under the heading "All general departments," shown in Table 6.

A very small number of the cities having a population of less than 30,000 reported receipts from poll taxes. In this state the poll taxes are assessed, levied, and collected with the property taxes, and are probably included with them where they are not shown separately in the table.

Under the heading "Business taxes" certain cities show receipts from a tax of 1 per cent on premiums received by foreign fire insurance companies. Such receipts are for the benefit of firemen's relief associations. In some cases this money is received by the city to be paid over to the associations, and in other cases the treasurer of the firemen's fund receives such money directly from the state. In the latter case the city has no record of the transaction.

Asbury Park reported the largest per capita receipts from interest and rents, due to the fact that the city owns a large amount of investment property.

NEW MEXICO.

No receipts from poll taxes are shown for Las Cruces or Silver City. Since all municipalities collect such taxes, the amounts of such collections in these cities are doubtless included in some other column.

The receipts from liquor licenses reported for Raton and Tucumcari are very high for the smaller cities of the state, being $3.06 and $2.18 per capita, respectively.

For Clovis, Las Cruces, and Tucumcari no receipts from nonbusiness licenses are shown. If these cities derived revenue from the dog tax, such receipts have not been reported separately.

The amounts shown in the column headed "Highway privileges" for Las Vegas city and Las Vegas town represent receipts from a street carnival and peanut stands in the streets.

Only three cities—Albuquerque, Raton, and Santa Fe—reported receipts from interest and rents.

In the column headed "Subventions and grants" no amounts are shown for Clovis, Las Vegas, or Silver City, for the reason that no school data for these cities were available.

The amount of donations and gifts reported by Raton represents contributions for the library and certain improvements.

NEW YORK.

The levying of poll taxes in New York appears to be optional with the cities, and only nine reported receipts from this source. If any of the other cities collected such revenues, the receipts were probably included with those from general property taxes.

Several of the cities did not report receipts from other business licenses, nonbusiness license taxes, or from fines, forfeits, and escheats. In many instances receipts from such sources are doubtless included with other items shown in the column headed "Earnings of general departments and miscellaneous."

The cities of Niagara Falls and Mamaroneck reported comparatively excessive receipts from highway privileges. These receipts were chiefly from railroad companies for paving along their right of way.

NORTH CAROLINA.

The city of Wilson did not report receipts from poll taxes. If such revenues were received by this city, they are probably included with general property taxes.

A few cities do not show receipts from fines, forfeits, and escheats. If there were receipts of this nature, they were either retained as fees and no record kept of the amount, or are shown under some other heading.

If there were departmental earnings in the city of Newbern, they were not reported separately.

The city of Graham shows no receipts from earnings of public service enterprises. The enterprise in this place, for which payments are shown in Table 6 and a valuation in Table 11, is a cemetery, and probably no lots were sold during the fiscal period covered by this report.

NORTH DAKOTA.

Poll taxes are shown for four cities—Bismarck, Devils Lake, Dickinson, and Mandan. These were reported as "Road poll taxes."

Business taxes were reported by Fargo, Grand Forks, Bismarck, and Dickinson. All four places show receipts from insurance companies; Fargo and Grand Forks, receipts from telephone companies; and Fargo, receipts from a light, heat, and power company.

Dickinson and Mandan are the only two cities that did not report receipts from nonbusiness license taxes. The receipts under this heading come almost entirely from the dog tax; Devils Lake, Grand Forks, Fargo, and Jamestown showing in addition small receipts from building and sewer permits.

Valley City and Williston show the largest receipts from public service enterprises. In both cities they came almost entirely from the electric light and water-supply systems.

OHIO.

The data presented showing the receipts of the cities in Ohio having a population of 30,000 and over were secured from local records by agents of the bureau, while those for the incorporated places having 2,500 to 30,000 inhabitants were compiled from records on file with the auditor's department, bureau of inspection and supervision of public offices, at Columbus.

OKLAHOMA.

A number of cities did not report receipts from poll taxes. Since such a tax is levied at the discretion of the city council or town trustees, it is possible that some of these cities derived no revenue from this source.

Three cities—Krebs, Pauls Valley, and Perry—did not report separately the amount of "other business licenses" collected; six cities did not report receipts from nonbusiness license taxes, such as sewer permits and automobile and dog licenses; Miami and Waurika did not report receipts from fines, forfeits, and escheats. It is probable that receipts from the sources mentioned were included with those of some other class, as earnings of general departments.

The amounts tabulated in the column headed "Subventions" are chiefly receipts from the state for school purposes. No receipts of this nature are shown for Kingfisher, for the reason that no report of the school transactions in this city was returned. In the case of Krebs, McAlester, Norman, and Waurika, the receipts from subventions for schools were probably included with receipts from general property taxes. The amount shown for Hugo represents state aid for the suppression of a smallpox epidemic.

Bartlesville, Hugo, and Nowata show high per capita receipts from earnings of general departments. For Bartlesville and Hugo the receipts of this character include considerable amounts described as engineers' fees, which were doubtless in the nature of private trust transactions, such as are included in Table 9 in the column headed "In trust and agency transactions." In the case of Nowata the entire amount represents school receipts, a portion of which at least would be more properly reported under some other caption.

No receipts from public service enterprises are shown for Perry, although small payments for the expenses of a water-supply system and a cemetery are shown in Table 6. This city derived no revenue from either enterprise during the year.

OREGON.

Klamath Falls and Ashland show the highest per capita receipts from general property taxes.

In Oregon a constitutional amendment forbids the levying of poll or head taxes, hence none are shown in the table.

The largest per capita receipts from special assessments were reported for the city of Salem for street improvement.

Pendleton shows the highest per capita receipts from subventions. This was from the county for schools.

Ashland reported the highest per capita earnings of public service enterprises. These came from the electric light and water-supply systems.

Only eight cities reported receipts from highway privileges. This revenue is mainly derived from telephone and telegraph franchises.

PENNSYLVANIA.

Pennsylvania cities did not derive any revenues from either special property taxes or business taxes.

Certain classes of cities may levy poll taxes, but apparently comparatively few did so during the year reported.

The high per capita receipts from fines, forfeits, and escheats shown for Ambridge are due to a receipt from a bond forfeited by the street railway company for failure to comply with the conditions of its contract.

Under the heading "Earnings of public service enterprises" a number of cities show receipts from markets, but show no valuations of these enterprises in Table 11. The receipts in some cases represent rents paid for space set aside on streets and curbs for market places, and no valuation is placed thereon.

RHODE ISLAND.

Three cities—Providence, Newport, and Smithfield—reported receipts from special property taxes, consisting of taxes collected by the state treasurer from nonresident shareholders of national bank stock, and apportioned to the places where the national banks were located.

Twelve cities reported receipts from business taxes. These were auctioneers' fees. Auctioneers were not licensed but were required to pay a tax of one-tenth of 1 per cent on all property sold, seven-eighths of the proceeds going to the state. In some cities receipts from this source were perhaps included with other items shown under the caption "Earnings of general departments and miscellaneous."

The majority of the smaller cities in the state did not report receipts from fines, forfeits, and escheats. If any of the cities other than those reporting derived revenues from such sources, the receipts were probably included with earnings of general departments.

The earnings of public service enterprises reported for Central Falls were rebates on the water bills of the residents of this city paid by the city of Pawtucket for the use of mains, hydrants, piping, etc., owned by the city of Central Falls.

SOUTH CAROLINA.

No receipts from poll taxes are shown for Charleston, for the reason that such taxes were not levied in this city.

The per capita receipts shown for Greenville and Rock Hill in the column "Special assessments and charges for outlays" are the largest reported by the cities of this state. Correspondingly large payments for outlays are shown for these cities in Table 6.

The amounts shown in the column headed "Business taxes" represent the collection of a tax on the premiums of foreign fire insurance companies. This tax is collected by the state, and the amounts collected are returned to the respective cities for the support of the fire departments.

No receipts from liquor licenses are shown for any of the cities of this state, the cities' share of the income of the state's liquor dispensaries being included in the receipts from public service enterprises. The amounts of such receipts are net; accordingly, no payments for these dispensaries are given in Table 6.

It will be noticed that the licensing of business other than liquor was an important source of revenue of every city in this state.

For 12 cities no receipts from subventions and grants were reported. Since there is a constitutional provision requiring each county to levy a tax for school purposes and to distribute the same to the school districts according to the number of pupils enrolled, it is probable that for these 12 cities such receipts are included elsewhere, probably in general property taxes.

SOUTH DAKOTA.

Five of the cities of this state did not report receipts from poll taxes. If such taxes were collected, the receipts were probably included with those from general property taxes.

Sioux Falls, Aberdeen, and Mitchell show large receipts from special assessments.

Six of the 13 cities show receipts from business taxes, which in each instance are from fire insurance companies.

In the column headed "Nonbusiness license taxes" Sioux Falls shows receipts of $1,039, which is about one-fourth of the total receipts of the municipalities of the state under this heading. More than half of the amount was for plumbing permits and the remainder for wiring permits.

Only two cities reported receipts from highway privileges: Huron, for gas and electric light franchises; and Mitchell, for street concessions during "Corn Palace Week."

Lead is the only city that reported no public service enterprise. Six of the other 12 cities of the state operated their enterprises at a financial loss, while the others showed gains.

TEXAS.

Eight of the 91 cities in the state having a population of over 2,500 did not report receipts from "other business licenses," which were occupation taxes collected from merchants, peddlers, etc. If these eight cities derived revenues from this source, the receipts are probably included with other items under some other caption.

The comparatively large receipts from nonbusiness license taxes shown for Galveston were chiefly from vehicle licenses, and those for Greenville were from sewer permits. Many of the cities did not report receipts from nonbusiness license taxes. In some of these instances receipts from usch sources were probably included with earnings of general departments.

Twenty-six cities reported receipts from highway privileges. The large amount received from this source reported by Houston was from an electric railway company for the use of a viaduct and the streets.

The amount shown as receipts from subventions for Galveston includes an item of $76,353, which was the amount of the state tax collected in the city and donated by the state of Texas as a partial offset to the loss by the flood of 1900. This grant continues for 17 years from the date of the disaster. Complete data relating to subventions for schools were not secured from several cities.

No receipts from public service enterprises are shown for Calvert, Cameron, and Nacogdoches, although Table 6 shows payments for the care of cemeteries, and the valuation of such property appears in Table 11.

UTAH.

The town of Bingham shows unusual conditions as to the sources of its revenue. There were no receipts from general property taxes for the fiscal year covered by this report, but very large receipts from liquor licenses.

In Murray the high per capita receipts from general property taxes may be accounted for by the collection of unpaid taxes of previous years.

Two cities do not show receipts from nonbusiness license taxes, consisting of dog licenses. If there were revenues from this source, they are included under some other heading.

VERMONT.

As in other New England states, the "towns" of Vermont correspond to the townships of other localities. In these tables the population of the city appears in italics when the city and the town in which it is located are not coextensive, thus indicating that it is included elsewhere in the column.

Hartford town and Montpelier show the highest per capita receipts from general property taxes.

In Vermont the poll tax constitutes an integral part of the general property tax, and the receipts from the two classes of taxes were segregated for only a few of the cities.

Receipts from liquor licenses were state revenues in Vermont, but amounts from this source are shown in the table for two places, the village of Bennington and the city of St. Albans. The annual report of the former place states that all of the $2,200 reported was for "First and second class liquor licenses." The report of the city of St. Albans gives the amount shown as "From licenses, liquor (city portion)," and it is only a part of the total receipts from this source.

Several cities did not report receipts from nonbusiness license taxes, such as dog licenses. Receipts from this source in the cities reporting them were not large, and it is not improbable that they were included by some of the cities with some other item of receipts.

Only five cities and villages reported receipts from highway privileges. These were mainly from telephone, telegraph, and street railway companies.

VIRGINIA.

Portsmouth, Hampton, Marion, Pulaski, Salem, South Boston, and Winchester did not report separately receipts from poll taxes. This tax is a lien upon real estate and the receipts may have been included with those from general property taxes. The following cities reported receipts from business taxes: Norfolk, $21,375, from the income tax; Petersburg, $13,200, and Winchester, $1,329, from insurance taxes. Clifton Forge, Pulaski, and Wytheville show no receipts from nonbusiness license taxes. These are for the most part derived from dog licenses, vehicle licenses, and departmental permits.

Eleven cities reported receipts from highway privileges, such as franchise receipts from corporations.

Eight cities did not report receipts from subventions, due to the fact that the school reports for these places were not complete. Where such receipts were reported the principal item was the amount received from the state for schools.

Ten cities reported receipts from donations, most of them small. The $25,000 reported by Winchester was for the Handley Library.

WASHINGTON.

In the column headed "General property taxes" the small per capita figure shown for Walla Walla is accounted for by the fact that the amount collected consisted only of school taxes and delinquent city taxes. The general property taxes that were revenues of the city for the year reported were collected by the county and were not paid over to the city until after the close of the fiscal year reported. The city, however, issued time warrants in anticipation of the receipt of these taxes. The per capita receipts in this column for Hillyard and Roslyn are also small. School revenues are not included in the amount shown for Hillyard, as this city is a suburb of Spokane and its schools are treated as a part of the schools of that city, no separate data being procurable. For Roslyn no explanation was given, but it is probable that the same conditions prevailed here as in Walla Walla.

Roslyn and South Bend are the only cities which reported receipts from poll taxes, these being optional in this state for all cities from 300 to 10,000 inhabitants. In the large cities they were not levied.

The improvements of the cities are generally under the control of local improvement districts, the funds of which are obtained by special assessments; consequently, large amounts are shown in the column containing the amounts of such revenues.

All cities except Hillyard, the school transactions of which were not reported separately, show large receipts from subventions. These were received for schools from both the state and counties.

Ellensburg shows per capita receipts of $10.14 from earnings of public service enterprises. These receipts were entirely from the electric light system and are more than balanced by the expenses of the same, a per capita expense of $12.28 being shown in Table 6.

WEST VIRGINIA.

The only city which shows receipts from business taxes is Wheeling, this amount having been received from foreign insurance companies.

Morgantown shows no receipts from "other business licenses." If there were such revenues, they were not reported separately.

WISCONSIN.

Only four of the smaller cities in the state reported receipts from poll taxes, the levying of which were optional with the city council.

All cities show receipts from business taxes, such as those on incomes and on the earnings of insurance, railroad, and steamship companies.

Nine cities did not report separately receipts from nonbusiness license taxes. If these cities derived revenues from such sources, the receipts were probably included with earnings of general departments. Such revenues, where collected, were chiefly from dog licenses and certain departmental permits.

WYOMING.

The receipts from poll taxes in Cheyenne are doubtless included in the table with those from general property taxes.

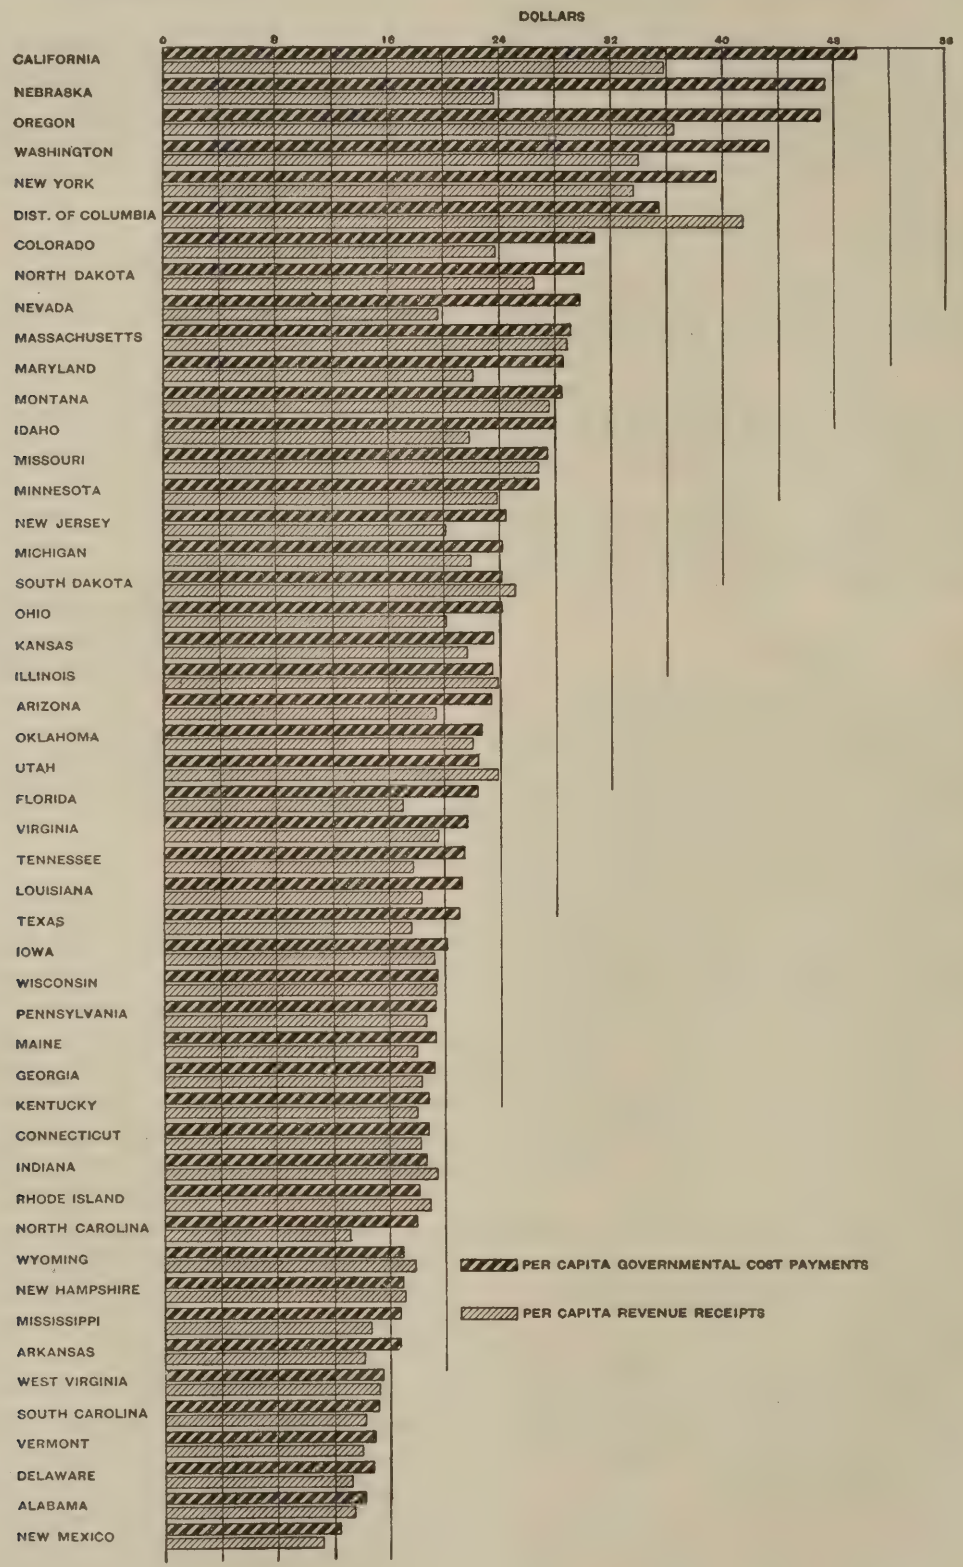
TABLES 5 AND 6.

Governmental cost payments of incorporated places.—In Tables 5 and 6 are presented, by states and by incorporated places, the governmental cost payments, total and per capita, of incorporated places having a population of 2,500 and over. These payments are classified primarily as expenses, interest, and outlays. The significance of each of these terms, as employed by the Bureau of the Census, is stated on page 389 of this report. Expenses are further classified under ten different headings, nine of which represent the general departments of municipal government, the remaining column presenting the expenses of the public service enterprises of municipalities. The payments for expenses of highways and schools do not include those made by independent road and school districts, the payments shown in these tables being only such as were made from municipal revenues.

It should be stated that for those cities having a population of over 30,000, payments for pensions of departmental employees are included with other items in the column headed "Miscellaneous and general;" while for cities having a population of 2,500 to 30,000 payments of this nature have been distributed to the various departments.

The diagram which follows shows graphically, by states, the relation between the per capita governmental cost payments and revenue receipts of incorporated places.

PER CAPITA GOVERNMENTAL COST PAYMENTS AND PER CAPITA REVENUE RECEIPTS OF INCORPORATED PLACES HAVING A POPULATION OF 2,500 AND OVER, BY STATES: 1913.



Certain defects of classification in the reports received by the bureau should be taken into account when using the municipal figures or the state totals affected thereby. These defects arise from lack of sufficient segregation, with the result that expenditures for certain objects are included with those for other objects. The principal of these defects, together with exceptional and interesting features, are pointed out in the paragraphs which follow.

ALABAMA.

Dothan, Jasper, and Union Springs reported high per capita expenses of general departments. For each of these cities, it will be noted, school payments were unusually large. For Jasper the payments for highways also were large.

Anniston, Tuscaloosa, Dothan, and Greenville reported no expenses for recreation. Doubtless the valuations appearing in Table 11 in the column "Recreation" represent the values of park lands yet undeveloped.

Two cities—Girard and Lanett—reported no payments for interest during the year. Both cities had indebtedness.

Two cities—Eufaula and Union Springs—reported no payments for outlays. In both cities the payments reported for expenses of general departments and public service enterprises are unusually high, and it is possible that they include some outlay payments.

ARIZONA.

The school transactions within the cities of Bisbee, Tucson, Clifton, Douglas, and Yuma not having been reported, the per capita expenditures for the costs of all general departments are low for these cities.

Nogales reported no payments for the care of parks, although Table 11 shows a valuation of park property.

Phoenix reported an expenditure of $118,145 for water system maintenance, $3,029 for extension of the same, and $14,548 for purchase of water for irrigation purposes. Large outlays for the extension of water-supply systems were also made by the cities of Douglas, Prescott, and Nogales. In addition to the outlays just noted, mention is made of payments of $155,570 for sewer construction and $73,286 for schools by Phoenix, and of $11,054 for sewer construction by Nogales. Phoenix increased its bonded indebtedness on account of these transactions.

ARKANSAS.

No payments for public service enterprises are shown for Helena, although receipts from such enterprises appear in Table 4. There doubtless were payments for the salary of weighmaster and incidental expenses of the city scales, but it was not possible to separate these from the payments for expenses of general government.

For Fayetteville very large payments for the water system in comparison with the receipts were reported. A portion of the amount may have been for outlays, but no segregation was possible.

The payments for the expenses of highways reported by Eureka Springs were comparatively high, being $2.20 per capita.

Fort Smith, Hope, Argenta, and Newport reported large amounts of outlays, the per capita amounts being $9.19, $6.70, $6.98, and $13.89, respectively.

Several cities for which valuations of parks are shown in Table 11 reported no payments for recreation. Presumably these parks were as yet undeveloped and no expense for their upkeep was entailed.

Newport and Texarkana reported the largest payments per capita for protection to person and property of all cities of their class.

Fayetteville reported by far the largest per capita payments for charities, hospitals, and corrections of all the incorporated places in the state. The amount so reported represents payments for hospitals.

The payments for schools shown for El Dorado are very small, the per capita being only $0.78, while the city showing the next lowest payments for this purpose is Mena, with a per capita of $1.77. A large valuation of school property, however, appears for El Dorado in Table 11.

CALIFORNIA.

The per capita governmental cost payments for Ocean Park exceed that of any other municipality in the state. The revenue receipts of this city, as shown in Table 4, are noticeably large. Seven other places—Alhambra, Corona, Glendale, Ontario, Pasadena, Richmond, and South Pasadena—show per capita payments for governmental costs far above the average for the state. This condition is due in most instances to the fact that these cities were making extensive public improvements and were meeting these outlay payments by means of special assessments.

Of the cities which have a population of more than 30,000, only two—Sacramento and San Jose—show no expenses for charities, hospitals, and corrections. If such expenses were incurred by these cities, they are included under some other heading.

Glendale shows a per capita payment for education of $27.23, the largest in the state.

No payments for the care of parks appear in the column headed "Recreation" for Grass Valley, Mill Valley, or Redding, although valuations of parks are given in Table 11 for these places. It is probable that the parks reported are unimproved sites and that these cities had no expense of this nature.

COLORADO.

A majority of the cities in this state having a population of less than 8,000 did not report payments for charities, hospitals, and corrections, as the expenses for such purposes were borne almost wholly by the counties.

No payments for school purposes are shown for Cripple Creek, Greeley, Sterling, or Victor. The

cities of Cripple Creek and Victor form a union school district and a segregation of the accounts was not possible from the information secured, while no reports were returned for Greeley or Sterling.

Florence and Lamar reported no payments for the care of parks, although small valuations of park property in these cities appear in Table 11.

The items composing the large amount shown for Denver in the column headed "Miscellaneous and general" were: Pensions, $22,703; city shop and garage, $32,813; printing and supplies, $14,949; city veterinarian, $600; advertising city's resources, $19,530; and administration of public trust funds, $17,416.

Cripple Creek is the only city in the state for which no payments for interest were reported. This city had outstanding debt, and it is probable that payments for interest were made but not reported separately.

The comparatively large payments for expenses of public service enterprises shown for the city of Fort Morgan were for maintaining a water-supply system, an electric light plant, and a cemetery.

The highest per capita outlay payments are shown for Grand Junction. The greater portion of the amount tabulated in the column headed "Outlays" for this city was for the extension of the water-supply system and for highway improvement.

CONNECTICUT.

The expenses shown in the column headed "All general departments" are high for Greenwich town, Simsbury town, and West Hartford town, the main items contributing to this in each place being large expenditures for highways and schools.

Guilford town had a volunteer fire department and the small expense shown in the column headed "Protection to person and property" was for another purpose. Greenwich had an expenditure of $5,951 for the fire department and $11,135 for the police department, the two together making the unusually high per capita expense of $4.40 for this city.

In the column headed "Conservation of health and sanitation" Greenwich had the largest per capita payment, street cleaning and garbage removal being the principal items in this expense.

For many cities no school expenses are shown, as these were reported by the towns within which the cities are located.

The large outlays in South Norwalk were for street extension and paving, a new library building, and a new water-supply system; in Putnam they were for the purchase of a water-supply system and a new sewer system; in Suffield town, a new school building; in West Hartford town, for streets, bridges, and sewers; and in Windsor Locks town, for the installation of a new sewer system.

FLORIDA.

The total governmental costs per capita for St. Petersburg are noticeably large, being $68.51 as against an average of $22.38 for the state. This is due in part to the fact that large sums were spent for public improvements, notably for the paving of streets and the construction of sewers.

Orlando leads in expenditures for the conservation of health and sanitation with a per capita expense of $6.55, the largest single item being for street cleaning.

No payments for the maintenance of schools are shown because the schools are under the jurisdiction of the counties and their financial transactions do not appear on the city records. The small amount which is shown for Orlando under this heading represents a donation to the Orlando Fair, and the amount for St. Petersburg represents a payment for the maintenance of a kindergarten.

No expense for the upkeep of parks is shown for either Apalachicola or Sanford, although Table 11 gives valuations of park properties for these places. If such expenses were incurred, they are included under some other heading.

GEORGIA.

The three cities of Cartersville, Fort Valley, and Washington did not report payments for conservation of health and sanitation. Payments by these cities for such purposes were probably included with the expenses for general government.

A large part of the amount shown as highway expenses for the city of Dublin was doubtless expended for outlays, but on account of lack of data a complete segregation could not be made.

The expenditures for maintaining water-supply and lighting systems by the city of Cedartown were not reported, and the small expenses of public service enterprises shown for this city were cemetery expenses.

Covington and Waynesboro did not report interest payments. The amount of interest paid during the year by the city of Covington was doubtless included in the item shown for redemption of debt obligations in Table 9. Waynesboro, while showing funded indebtedness of $57,500 at the close of the year, reported that no interest payments were made during the year.

IDAHO.

Only three cities—Boise, Lewiston, and Sandpoint—reported expenditures for charities, hospitals, and corrections. If payments for such purposes were made by any of the other cities of the state, they were probably included with the expenses of general government.

The cities of Pocatello and Idaho Falls did not report separately payments for recreation, but probably included such payments with those for general

government. No valuation of park property is shown for the former city in Table 11.

The highest per capita payment for outlays is shown for Weiser. The larger portion of the amount classified as outlays for this city was expended for the extension of the water-supply system.

ILLINOIS.

The city of Winnetka shows the highest per capita payments for governmental costs, $66.50. This is partly accounted for by the large amounts spent for new school buildings and for permanent improvement of highways.

Rochelle, Lake Forest, and Oak Park also have high per capita payments for governmental costs, and the explanation is found in their expenditures for permanent improvements.

The amount spent by Cairo for protection to person and property is noticeably large, the per capita being $6.66 as against the average of $3.61 for the state. An expenditure of more than $50,000 was made for flood protection alone.

Four municipalities—Downers Grove, Forest Park, Sandwich, and Sparta—did not report any expenses for the conservation of health and sanitation. Sandwich and Sparta reported outlay payments for sewers, and Downers Grove paid debt incurred for the construction of sewers. If any maintenance expenses were incurred, they are included under some other heading.

The highest per capita expense for the maintenance of highways is shown for Lake Forest, being $8.38, while the average for the state was $1.34.

A number of cities show high per capita payments for educational expenses. This may in some instances be accounted for by the fact that the area of the independent school district exceeds that of the city corporation, while the per capita payments are based in every instance on the population of the city alone.

A few cities show an expense under the heading "Recreation," but do not show a valuation of park properties in Table 11. The amounts shown for these cities represent payments on account of celebrations and care of trees in the streets. For a considerable number of cities valuations of park properties are shown in Table 11, while no expenses for maintenance are shown in Table 6. It is probable that in some instances the property termed "parks" is miscellaneous real estate owned by the city and no expense was incurred on account of it. If, in other instances, park expenses were incurred, they are included under some other heading.

The most important item in the large amount reported for Chicago in the column headed "Miscellaneous and general" consisted of pensions paid to the employees of the several departments.

Mound City shows neither receipts nor payments on account of public service enterprises, but Table 11 shows the valuation of a city-owned cemetery. This may be due to the fact that the sexton makes no report to the city of the amount received by him as compensation for services performed.

The expenditures on account of the public scales of Mount Carmel and Sparta, for which receipts are shown in Table 4, were not reported separately.

INDIANA.

The total and per capita governmental cost payments for the city of Gary were comparatively large. The report secured from this city covered the calendar year 1912, but the per capita payments were computed on the population enumerated as of April 15, 1910, as no later figures were available, and on account of the city's rapid growth are larger than would be the true per capita payments computed on the population on December 31, 1912.

The cities of Angola and Greencastle reported receipts from public scales, which were classified as receipts from a public service enterprise, but the expenses of maintenance were not reported separately. The payments for such purposes were included with other items shown under the caption "General government."

Four cities—Aurora, Clarksville, North Vernon, and West Terre Haute—did not report separately payments for outlays. In those cities the outlay payments were doubtless included with the payments for maintenance.

IOWA.

No payments for charities, hospitals, and corrections were reported for Mason City or Ottumwa, although valuations of hospitals for these cities appear in Table 11.

No payments were reported for the markets and public scales of Shenandoah or for the wharves and landings of Ottumwa. It may be that the receipts from these enterprises shown in Table 4 were the net revenues from these sources. Otherwise, any payments on their account are included in other items.

KANSAS.

Seven of the 53 cities in the state did not report separately payments for conservation of health and sanitation. If these cities made such expenditures, the payments were probably included with those for general government.

Many cities did not report expenses for charities, hospitals, and corrections. In many instances, doubtless, payments for such purposes were included with other items shown as general government expenses. For Fort Scott and Winfield valuations for hospitals and almshouses appear in Table 11, and these cities probably made payments for such institutions.

The large amount shown for Salina in the column headed "Miscellaneous and general" consists chiefly of payments of judgments on account of personal injury.

LOUISIANA.

Payments for protection to person and property, for conservation of health and sanitation, and for charities, hospitals, and corrections, when not reported separately, were probably included with other items shown under the caption "General government." The large payment for charities, hospitals, and corrections, shown for Baton Rouge includes an item of $8,500 for flood sufferers.

The amounts shown as payments for education, with the exception of those for New Orleans and Lake Charles, do not represent the total expenses for schools in the cities, but only the amount contributed by the municipalities as supplementary to the parish school fund.

Lake Charles and Minden did not report separately the amounts expended for the care of parks, valuations of which appear in Table 11.

The amount shown in the column headed "Miscellaneous and general" for Monroe represents a subsidy for a railroad.

Crowley, Lake Charles, and Shreveport show high per capita outlay payments. Crowley expended for highway improvement the total amount reported as outlays; Lake Charles reported large payments for schoolhouse construction; and Shreveport made extensive improvements of its parks and streets.

MAINE.

Large outlays reported by Bangor include amounts for highways, $63,082; schools, $151,849; and library, $60,348. Those reported by Eden town include amounts for highways, $34,067; and purchase of land for parks, $22,055. Nineteen civil divisions reported per capita outlays amounting to less than $1 while three reported no outlays.

The large payment for outlays shown for Rumford Falls was for the Rumford and Mexico water district, which supplies both places with water, the transactions for Rumford Falls being inseparable from those for the entire district.

MARYLAND.

The amount shown for Baltimore represents 93.3 per cent of the total for the 15 incorporated places. Expenses for schools are shown for Baltimore alone, for the reason that this city performs county functions, one of which is the management of the schools.

Chestertown is the only city for which no expenses for conservation of health and sanitation were reported. Whatever expenditures were made for this object are included with those for other purposes.

Havre de Grace is the only city showing no expenditures for outlays during the year.

For Westminster no expenses for recreation were reported, although a valuation of parks appears in Table 11. These parks were probably undeveloped and entailed no expense.

The amounts shown for Cumberland and Hagerstown in the column "Expenses of public service enterprises" are comparatively large. Both cities operated extensive electric light plants, and Cumberland operated also a water-supply system of considerable proportions.

MASSACHUSETTS.

All but six of the cities and towns of this state show payments for the maintenance of libraries. Easton, which is one of this number, reported a valuation for libraries, which is included in the amount shown for that city in Table 11 in the column headed "Schools and libraries."

The outlays reported were chiefly for sewer construction and street improvement.

MICHIGAN.

Several cities of this state did not report separately payments for charities, hospitals, and corrections, but expenses for such purposes are, for some of these cities, doubtless included with other items shown in the column headed "General government."

No payments are shown on account of schools for Laurium and Red Jacket, for the reason that these cities are included in a joint school district and it was impossible to obtain separate reports of the financial transactions.

MINNESOTA.

The per capita governmental cost payments are high for ten cities—Albert Lea, Chisholm, East Grand Forks, Ely, Eveleth, Hibbing, South St. Paul, Thief River Falls, Virginia, and Waseca. This is due principally to large payments for outlays by these cities for highways and schools.

Several cities failed to report separately their payments for charities, hospitals, and corrections.

East Grand Forks, Little Falls, and Waseca reported no payments in the column headed "Recreation," although Table 11 shows valuations of park property.

Eveleth and Virginia reported no payments for city scales, which were conducted by them as public service enterprises and for which receipts are shown in Table 4. It is possible that the receipts reported were those in excess of running expenses; otherwise, the payments for this object are included in some other item.

MISSISSIPPI.

Comparatively large per capita payments for schools are shown for Clarksdale, Greenwood, Grenada, and Gulfport.

Several cities for which park valuations appear in Table 11 reported no payments for recreation. In these cities, doubtless, the park lands were as yet undeveloped.

No outlay payments were reported for Natchez, Collins, Pascagoula, West Point, and Winona. The outlay payments reported for Biloxi, Jackson, Greenwood, Okolona, and Tupelo were comparatively large, extensive improvements having been made in these cities during the year.

MISSOURI.

The per capita governmental cost payments for Kansas City, Kennett, and Webster Groves are quite high, due to the large amounts spent for permanent improvements.

Fredericktown shows no payments for protection to person and property. It is probable that such expenses were incurred and are included under some other heading.

All but 9 of the 60 cities of this state show payments for the conservation of health and sanitation.

No report of the financial transactions of the schools of Excelsior Springs was obtained. This accounts for the fact that Table 6 shows no payments for this city in the column headed "Education," and Table 4 shows no receipts from subventions and grants.

Fulton and Trenton show no payments on account of charities and corrections, although Table 11 shows a valuation of properties used for these purposes. If such expenses were incurred, they were not reported separately.

Cameron, Mexico, and Neosho show no payments for park maintenance, although Table 11 shows valuations of park properties.

MONTANA.

Nine of the 14 cities in the state having a population of over 2,500 did not report payments for charities, hospitals, and corrections. It is probable, however, that in some instances payments for these purposes were included with other items under the caption "General government."

The comparatively large expenses for recreation shown for the city of Great Falls were payments for the maintenance of parks.

NEBRASKA.

The city of Omaha shows the highest per capita payments for governmental costs. This is due to the large amount expended for permanent public improvements, the per capita outlay payments being $59.43 as against the state average of $28.48.

Only two cities—Aurora and Benson—show no payments for the conservation of health and sanitation. If such payments were made by these cities, they were not reported separately.

Fairbury shows no payments for the maintenance of parks, although a valuation of park property appears in Table 11. Small recreation expenses are shown for a few cities for which no valuation of park properties is shown in Table 11. These amounts represent payments for care of trees, for entertainments, and for care of privately owned parks, except in the case of McCook. It is probable that the valuation of park property in this city could not be obtained.

A number of cities show the expenses of their public service enterprises to be greater than the earnings. It is unusual for such enterprises to operate at a loss. It is probable that some of the amounts classified as expenses were outlays.

NEW HAMPSHIRE.

Of the comparatively large amount shown for the town of Walpole as expenses for general government, $12,385 consisted of attorneys' fees.

NEW JERSEY.

Seven cities—Edgewater, Fort Lee, Glen Ridge, Long Branch, Ridgewood, South Orange, and Summit—reported per capita expenses for the maintenance of highways amounting to more than $5 each. It is probable that for these cities the segregation of highway outlays from highway expenses was not complete.

Per capita expenses for recreation amounted to less than $1 for every city except Asbury Park. The per capita payments reported by that city were $9.54, the high rate being the natural result of the popular use of the city as a summer resort.

NEW MEXICO.

The governmental cost payments of Las Cruces for expenses, it will be noticed, were exceptionally small, while those for outlays were very large.

All cities except Santa Fe reported payments for conservation of health and sanitation. This city doubtless had expenditures for this purpose, but the amount could not be ascertained and separately shown.

Roswell reported the largest payments for charities, hospitals, and corrections.

No amounts are shown in the column headed "Schools" for Clovis, Las Cruces, or Silver City, for the reason that the school data for these cities were not procured.

All incorporated places reported payments for interest, and all but two—Las Vegas city and Las Vegas town—reported payments for outlays.

NEW YORK.

Three cities—Frankfort, Goshen, and Newark—did not report separately payments for conservation of health and sanitation. If these cities had expenses for such purposes, the payments are probably included with other items shown in the column headed "General government." Frankfort and Newark, however, reported large payments for outlays for these objects, which may include payments for maintenance.

The majority of the smaller and a few of the larger cities in the state did not report payments for charities, hospitals, and corrections. Payments for such

purposes are doubtless in many instances included with those for general government.

The comparatively large amount shown as payments for miscellaneous and general purposes for the city of Bath includes a loss by defalcation of $17,259.

The exceptionally large outlays reported for Waverly were principally for a water-supply system, the payments for that purpose alone being $238,340.

NORTH CAROLINA.

The high per capita governmental cost payments shown for Statesville is explained by reason of the large outlay payments.

The only city which does not show payments for the conservation of health and sanitation is Greenville. If such expenses were incurred by this city, they are included with payments for some other object.

NORTH DAKOTA.

Fargo shows the highest per capita payments for all general departments, expenses for highways contributing largely to this. The chief item in the expense of highways was the replacement of pavements, only the excess of the cost of the more permanent structures over that of the wooden pavements replaced being classified as outlays.

Minot reported no payments for the care of parks, although Table 11 shows a valuation of $20,000 for park property.

OHIO.

The data presented showing governmental and nongovernmental cost payments of the cities in Ohio having a population of 30,000 and over were secured from local records by agents of this bureau, while the payments for the incorporated places having 2,500 to 30,000 inhabitants were compiled from records on file with the auditor's department, bureau of inspection and supervision of public offices, at Columbus.

OKLAHOMA.

The high per capita payments for protection to person and property for Bartlesville and Claremore are due in both cases to large payments for salaries of police and fire departments.

Five cities—Alva, Kingfisher, Krebs, Waurika, and Woodward—reported no payments for conservation of health and sanitation.

The high per capita highway expenses shown for Bartlesville and Clinton are due in part to the impossibility of segregating payments for outlays from those for expenses. Both cities reported large expenditures for street lighting.

High per capita payments for schools are shown for Nowata and Claremore. It is possible that a portion of the amount reported for Nowata as expenses should have been classified as outlays. In the case of Claremore, although the school district covers a much larger area than the city, the per capita expense is based upon the population of the city only.

For Bartlesville the payments for the care of the cemetery, which should appear in the column headed "Expenses of public service enterprises," were not separable from the payments for the care of parks. Elk reported no payments for the expenses of the water-supply system, for which receipts are shown in Table 4. It is probable that they are included with the expenses of general government. The per capita expenses of public service enterprises shown for Woodward are noticeably high, due, doubtless, to inclusion of outlays with expenses.

The high per capita outlay payments for Pawhuska, Purcell, and Tulsa are due to the construction and extension of waterworks; for Pauls Valley, to highway improvement and the erection of a new school building; for Norman, to park and sewer outlay; and for Blackwell, to pipe-line construction.

OREGON.

Klamath Falls shows the highest per capita expenses for all general departments. The greater part of this was for schools.

Baker City reported no expense for health and sanitation. This may have been included with expenses for general government.

No expenditures for charities, hospitals, and corrections were reported for The Dalles, although Table 11 carries a valuation of $1,500 for an asylum or almshouse.

Pendleton shows the highest per capita outlays, which were principally for schools and highways.

PENNSYLVANIA.

All but three of the cities—Curwensville, Parkesburg, and St. Clair (Allegheny County)—show payments for conservation of health and sanitation. In St. Clair there was an expenditure for sewer construction, but it appears in the column headed "Outlays." If sewer expenses were incurred by the other two cities, they are included in some other item of payments.

Among the smaller cities but few show payments for charities, the charity funds in most instances being administered by county authorities. The city of Rochester reported no payments on account of the hospital, for which a valuation of $60,000 is shown in Table 11. This is due to the fact that the hospital is owned by the city but conducted by private individuals.

Several cities reporting park valuations in Table 11 reported no payments for the care of parks. It is possible that the values shown are for unimproved park sites and that these cities had no expense for park maintenance.

The large amount shown for Winton in the column headed "Miscellaneous" represents a payment for damages resulting from a defective bridge.

In a few cities there are shown payments on account of public service enterprises for which Table 11 gives no valuation. In some instances parts of the municipal buildings were used and the valuation was not reported separately. A number of cities show no expenses of public service enterprises, for which valuations appear in Table 11. In most cases these enterprises were scales and markets, for which rents were received but no expenses incurred.

RHODE ISLAND.

The per capita expense for highways for Tiverton is comparatively high, due probably to the impossibility of completely segregating the outlays for highways from the expenses.

The expenses for public service enterprises shown for Central Falls were payments for repairs to meters, mains, hydrants, piping, etc., of a water-supply system owned by this city but operated by the city of Pawtucket. Tiverton did not report separately the expenses of the cemetery for which receipts are shown in Table 4, in the column headed "Earnings of public service enterprises."

SOUTH CAROLINA.

Aiken reported no payments for charities, hospitals, and corrections, although the valuation of a hospital is given in Table 11.

Camden, Chester, Clinton, Darlington, Florence, Greenwood, and Union reported no expenses for recreation, although valuations for parks are given in Table 11.

The expenses reported as for protection to person and property for Charleston, Darlington, and Georgetown were much higher per capita than those reported for the other cities of the state.

Chester and Georgetown reported comparatively large expenses per capita for highways.

No payments are given for Darlington and Georgetown in the column headed "Expenses of public service enterprises," although receipts from enterprises are shown in Table 4 for these cities. The receipts so tabulated represent the net income from liquor dispensaries. Payments for the maintenance costs of such enterprises have been necessarily omitted for all cities operating them.

The per capita payments for outlays in the cities of this state vary greatly, as is natural, even though the most careful segregation of expenses and outlays was made. By far the largest per capita outlay is shown for Marion, in which city extensive school improvements were made during the year.

SOUTH DAKOTA.

Deadwood shows the highest per capita expenses for all general departments, for highways, and for schools.

Madison reported the largest expenditures for conservation of health and sanitation shown for any city. Redfield is the only city showing no expense for this object, and Lead and Brookings the only cities that have no library expenses.

The $5,000 shown for Mitchell in the column headed "Miscellaneous" represents a donation to the Commercial Club of that city.

Brookings had the highest per capita expense for public service enterprises. More than two-thirds of this was for the electric light system.

TENNESSEE.

No expenses for protection to person and property are shown for Union City, although valuations for city jail and fire department apparatus were reported. Any amount expended for this purpose has been included in the column headed "General government."

Paris was the only city reporting no expenses for highways. Columbia and Murfreesboro reported large expenses for highways, doubtless due to the inclusion of outlays.

For Lebanon alone no expenses for schools are shown, the schools of this city having been wholly under county control. For Morristown and Rockwood, the school data are incomplete, the greater portion of school expenses having been borne by the counties.

A comparatively large amount is shown for Harriman in the column headed "Miscellaneous and general." This amount represents judgments for personal injuries paid during the year.

No expenses for recreation are shown for Johnson City, Bristol, Harriman, Park City, and Rockwood. The valuations for parks given in Table 11 are probably those of land for parks not yet developed.

Lebanon reported no payments for interest, although a considerable amount of outstanding debt was reported.

For Bristol, Morristown, and Union City, comparatively large amounts are shown in the column headed "Outlays," due to extensive construction and improvements.

TEXAS.

Two cities—Commerce and Waxahachie—did not report separately payments for protection to person and property, and nine cities reported no expenses for conservation of health and sanitation. It is probable that for a few of the cities payments for the purposes mentioned are included with those for general government.

The reports secured from 12 cities were incomplete in that they failed to show the payments for schools.

Nacogdoches shows no payments for the expenses of the water-supply system for which receipts are shown in Table 4.

UTAH.

The highest per capita payments for protection to person and property are shown for Bingham, being $4.14 as against an average of $1.80 for the state.

The towns of American Fork and Spanish Fork reported no expenses for the maintenance of parks, although park valuations are shown in Table 11, in the column headed "Recreation."

Lehi alone shows no payments for permanent public improvements.

VERMONT.

Montpelier shows the highest per capita expenses for all general departments.

For schools Springfield had the highest per capita expense, $7.63; Hartford town having the next highest, $7.34. Nothing is shown for St. Johnsbury, it being impossible to separate the school transactions of this city from the total transactions of the union school district in which it is included. The small amount of school payments shown for Proctor town is for the tuition and transportation of pupils to village schools.

VIRGINIA.

Marion, Radford, South Boston, and Wytheville, show no payments in the column headed "Conservation of health and sanitation." These may be included elsewhere, as is sometimes the case, especially when the amounts are small.

Buena Vista, Covington, and Williamsburg reported no payments for outlays. In Farmville, which shows the largest per capita outlays, the most considerable item was for schools.

For Big Stone Gap, Marion, and Williamsburg valuations of park properties are shown in Table 11, but no expenses for park maintenance are shown for these cities in Table 6. If such expenses were incurred, they were not reported separately.

WASHINGTON.

The large expense for general government for South Bend was chiefly for the engineer's department, and that for Wenatchee includes rent for a city hall which was used also by the fire and police departments.

Snohomish reported no expenditures for conservation of health and sanitation. Sewers were built by this city during the year, the cost being included in the column headed "Outlays."

No payments are shown for Hoquiam in the column headed "Expenses of public service enterprises," although receipts from docks and wharves are shown in Table 4.

The school expenses of Hillyard being inseparable from those of Spokane, no payments are shown for Hillyard in the column headed "Schools."

Large outlays are shown for many cities. These were generally made for highways, large amounts being spent for this purpose in Vancouver, Bremerton, Chehalis, Olympia, and South Bend. Ellensburg, which shows the highest per capita outlays, established a new water-supply system at a cost of $83,920, and expended $61,025 in improving its electric light plant.

WEST VIRGINIA.

Three cities—Clarksburg, Parkersburg, and Charles Town—show high per capita governmental cost payments, which are accounted for largely by expenditures for permanent improvements.

No payments for the conservation of health and sanitation were reported for Richwood. If expenses of this character were incurred, they are shown under some other heading.

Fairmont, Elkins, and Williamson show no payments for park maintenance, but show valuations of park properties in Table 11; such payments may have been made but included with those for some other object in the reports for these cities.

WISCONSIN.

Several cities did not report expenses for charities, hospitals, and corrections. It is probable, however, that in some instances payments for such purposes were included with those for general government.

A few of the cities reported comparatively large expenditures for schools. The amounts shown as payments for maintenance may, for some cities, include payments for new buildings and other outlays, which could not be segregated for lack of data.

The payments for the maintenance of the markets and scales of Menomonie and Ripon were not reported separately. Receipts from these enterprises appear in Table 4 in the column headed "Earnings of public service enterprises," and valuations therefor are given in Table 11.

WYOMING.

Rawlins was the only city in the state which did not report expenses for conservation of health and sanitation. It is probable that payments for such purposes were included in the report of this city with those for general government.

No segregation of the expenses for the maintenance of highways from the outlays of this department was made for the city of Laramie, the total amount expended for highways having been reported as outlays.

The large outlays shown for the city of Rawlins were principally for new school buildings and a water-supply system.

TABLE 7.

Per cent distribution, by principal classes, of revenue receipts and governmental cost payments of incorporated places.—Table 7 presents, by states and by incorpo-

rated places, the per cent which the receipts from each class of municipal revenues constitute of such total revenue, the per cent which the payments for each of the principal classes of municipal governmental costs constitute of the total of such payments, and the per cent relation of the total revenue receipts to the several classes of governmental cost payments. The percentages for revenue receipts have been computed upon the basis of the receipts shown in Table 3, and those for governmental cost payments have been computed upon the basis of the payments shown in Table 5. Certain inaccuracies pointed out in the text relating to Tables 4 and 6 necessarily affect the data presented in Tables 3, 5, and 7. It is believed, however, that the proportions of the different classes of revenues and expenditures are not seriously affected thereby.

Per cent distribution of revenue receipts.—Table 7 shows that property taxes, including both general property taxes and special property taxes, comprised 61.1 per cent of the revenues of the incorporated places in the United States. Earnings of public service enterprises ranked second in relative importance, comprising 10.8 per cent of the total revenue receipts.

Subventions and grants from other civil divisions and donations and gifts, principally for school purposes, constitute 5.1 per cent of the total receipts. Donations and gifts constituted only a very small part of the amounts on which these percentages are based.

Per cent relation of revenue receipts to governmental cost payments.—Of the total revenue receipts of the incorporated places in the United States, 77.9 per cent was required for meeting expenses and interest, leaving 22.1 per cent available for outlays, reduction of indebtedness, purchase of investments, or increase of cash in the treasury.

Per cent distribution of governmental cost payments.—Of the total payments for governmental costs, 58.6 per cent was for expenses, 10.6 per cent for interest, and 30.8 per cent for outlays. Of the payments for expenses, 91.3 per cent was for the support of the general departments of the municipal governments, the remainder being for the administrative and operating costs of public service enterprises.

Tables 8 and 9.

Nonrevenue receipts and nongovernmental cost payments of incorporated places.—Tables 8 and 9 present, by states and by incorporated places, the nonrevenue receipts and nongovernmental cost payments of incorporated places, each being classified under five different headings.

Receipts and payments on account of indebtedness constitute the greater part of the total amounts appearing in this table, the receipts of this kind amounting to $732,702,345, or 71.1 per cent of the total receipts, and the payments on such account amounting to $536,806,303, or 60.1 per cent of the total payments. Next in order of importance are the receipts and payments on account of general transfers, or transfers between the municipalities and their independent departments. These amounts do not exactly agree because of difference in fiscal years of certain incorporated places and their departments.

The amounts received from sales and paid for the purchase of investments and supplies show that during the year 1913 the incorporated places here reported increased their assets in the form of investments and supplies to the amount of $63,457,184. Counterbalancing receipts and payments were reported to the amount of $9,821,368.

Tables 10 and 11.

Value at close of year of properties and assets of funds.—In Tables 10 and 11 the values of municipal properties are presented, by states and incorporated places, under seven different headings, while the last column shows the assets of municipal investment and public trust funds.

Certain evidences of incompleteness in the reports received and details of interest are presented in the paragraphs which follow:

ARIZONA.

The amount shown in the column headed "Charities, hospitals, and corrections" for Tucson is the valuation of the city pesthouse, the expenses of which are included in Table 6 in the column headed "Conservation of health and sanitation."

ARKANSAS.

No valuations are given in the column headed "Protection to person and property" for Malvern and Texarkana, although expenses for this object are shown for these cities in Table 6. All valuations for the police and fire departments and jails in these cities were reported with those for general government.

CALIFORNIA.

The towns of Emeryville, Grass Valley, Orange, and Porterville reported no valuation of buildings for general governmental purposes. The valuation of such property was not obtainable, or the officers of the general departments occupied rented quarters.

In the column headed "Public service enterprises" Napa shows a valuation of docks and wharves, although no receipts or payments on account of such properties appear in Tables 4 and 6.

The towns of Marysville and San Mateo report the valuation of cemeteries as public service enterprises, but Tables 4 and 6 do not show receipts or payments under this heading. Monterey and Red Bluff show valuations and earnings of cemeteries but no expenses.

DELAWARE.

The general city offices and police department of the city of New Castle were quartered in buildings belong-

ing to the William Penn trust fund held by the "Trustees of New Castle Commons," no report of which was received.

FLORIDA.

In the column headed "General government" no valuation is shown for Lake City. It is probable that the officers of the general departments occupied rented quarters or that an estimated value of such property was not obtainable.

No valuation of park properties is shown for Fernandina, although Table 6 shows an expense for city parks. It is probable that no valuation was obtainable.

GEORGIA.

For eight cities—Covington, Dalton, Douglas, Fort Valley, Marietta, Moultrie, Washington, and Waynesboro—no valuation of city halls or other general government buildings and equipment is shown. It is probable that these cities used rented quarters.

Several cities for which valuations are shown in this table in the column headed "Recreation" reported no expenses for the care of parks. The valuations returned were probably for undeveloped land not yet utilized for park purposes.

ILLINOIS.

The valuation of a water-supply system is shown for Duquoin, but no receipts or payments on account of such an enterprise are shown in Tables 4 and 6. Although this enterprise is owned by the city, it is operated by a private company, and during the fiscal period covered by this bulletin the city received no revenue therefrom.

INDIANA.

No valuations are shown for Clarksville in the columns headed "General government" and "Protection to person and property." Fire protection in this city is furnished by the adjoining city of Jeffersonville.

No valuations of city halls are shown for Laporte, Plymouth, Portland, and West Terre Haute. The city officials used rented quarters.

KANSAS.

No valuation of school property was returned for Dodge City. The $13,000 appearing in the column headed "Schools and libraries" represents the value of the city library.

KENTUCKY.

Where no valuation is reported in the column headed "Protection to person and property" the value of the jail is doubtless included in that shown in the column headed "General government."

LOUISIANA.

The amount shown for Alexandria in the column headed "Schools and libraries" represents the value of a library only; and the amount shown for Lake Charles includes $13,000 of library valuation. The valuation of schools is shown for three cities only, the schools in this state generally being the property of the parishes.

MASSACHUSETTS.

It is probable that a valuation should be shown in the column headed "Recreation" for a number of cities and towns where no such valuation appears.

MISSISSIPPI.

No valuations are given in the column headed "Charities, hospitals, and corrections," for cities reporting payments for these objects in Table 6. In these cases the cities have made donations to privately owned institutions or to outdoor poor.

No valuation is shown for Clarksdale in the column headed "Protection to person and property," although payments for fire protection appear in Table 6. The fire company in this city is a volunteer organization.

MISSOURI.

Twelve cities show no valuation under the heading "General government." The officers of the general departments may have occupied rented quarters, or the valuations of such properties may not have been obtainable.

Six of the cities do not show a valuation of jails. Two of them are suburbs of St. Louis. The others are county seats of their respective counties and probably made use of the county jails.

NEBRASKA.

Four of the cities of this state do not show valuations for municipal buildings. It is probable that the officers of the general departments occupied rented quarters or that the valuations of such buildings were not obtainable. In some instances the cities not showing valuations of general government buildings are the seats of county governments and probably made use of county buildings.

McCook is the only city not showing a valuation of jails. As McCook is the county seat, the police department doubtless makes use of the county jail.

NEW HAMPSHIRE.

The small amount shown for Lancaster town in the column headed "Protection to person and property" is the valuation of the equipment of the police department only. This city used the county jail.

The large amount classified as "Miscellaneous" for Franklin includes the value of a central heating plant.

NEW JERSEY.

Edgewater shows a valuation of $35,990 in the column for public service enterprises. This is the estimated value of a public dock, although no receipts or expenses were reported on account of it.

The value of the public scales of West Hoboken is shown in the column headed "Public service enterprises," although no receipts or payments on account of such enterprise appear in Tables 4 or 6.

NEW MEXICO.

No valuation appears in the column headed "Protection to person and property" for Santa Fe, although payments for fire and police protection are shown in Table 6.

NEW YORK.

The valuation of the water-supply system owned by the village of Catskill was not reported, but the cost of construction was estimated by the village treasurer at $250,000.

NORTH CAROLINA.

In the column headed "Charities, hospitals, and corrections" Henderson shows the valuation of an almshouse, but in Table 6 no expenses are reported for charities and hospitals. Such expenses were probably incurred but not reported separately.

The amount shown for Wilmington in the column headed "Schools and libraries" is the valuation of the library only. No school data for this city were secured.

Three cities—Fayetteville, Hickory, and Wilmington—have park valuations shown in Table 11, but no park expenses in Table 6. It is probable that there were such expenses and that they are included under some other heading.

The high valuation for Durham in the column headed "Miscellaneous" is due mainly to a sewage disposal plant, valued at $26,071; city stables, at $17,443; and equipment of highway department, at $10,489.

In Wilmington the values tabulated under the heading "Miscellaneous" are mostly those of an incinerating plant, valued at $35,000; city stables, at $15,000; and equipment of highway department, at $10,000.

In Winston the amount tabulated under the heading "Miscellaneous" is made up of $40,000, railroad stock; and $24,475, real estate.

Greensboro seems to own the most valuable parks in the state, valued at $100,000. Asheville comes next, its parks being valued at $66,500.

OHIO.

The data presented showing the value of property of cities in Ohio having a population of 30,000 and over were obtained from local records by agents of this bureau. The valuations shown for incorporated places having a population of 2,500 to 30,000 were secured by correspondence with city officials, who in several instances failed to make complete reports.

OREGON.

Valuations of departmental properties are shown in this table for Corvallis, although for some of the departments no payments are shown in Table 6 because of the incompleteness of the report secured.

PENNSYLVANIA.

A number of cities show no valuation for municipal buildings. Where a city is the seat of county government the officers of the general departments sometimes find office accommodations in county buildings. When county buildings are not available quarters are rented.

RHODE ISLAND.

The small amount shown for Johnston in the column headed "General government" represents the value of office furniture only. Rented quarters were used for offices in this city and also in North Smithfield.

The valuation shown for Central Falls in the column headed "Public service enterprises" is for hydrants, street mains, piping, etc., owned by the city of Central Falls, through which the city of Pawtucket operated the water system, as described in the text for Tables 4 and 6.

SOUTH CAROLINA.

Aiken reported the valuation of a hospital, but no payments for charities, hospitals, and corrections during the year.

No valuations are shown in the column headed "Public service enterprises" for Camden, Darlington, and Georgetown, although all of these cities show receipts from such enterprises in Table 4. The receipts given for the last-named city represent liquor dispensary income and no valuation for this enterprise could be given; but for Camden and Darlington the receipts came from opera house rental and the valuations of these opera houses should have been returned.

SOUTH DAKOTA.

For Pierre and Redfield no valuations are shown in the column headed "General government." It is probable that the city offices occupied rented quarters and that no estimate of the office equipment was obtainable.

The large amount shown for Yankton in the column headed "Miscellaneous" is the value of unused real estate.

TENNESSEE.

For several cities the valuations of the city hall and fire and police stations are not shown. In such cases either rented quarters were used or estimates of the value of the properties were not obtainable.

For Cleveland no valuation is shown in the column headed "Protection to person and property." This

city uses the county jail, and no valuation of the equipment of the fire department was obtained.

Johnson City, Harriman, Park City, and Rockwood reported valuations of park properties, although Table 6 does not show payments for these cities in the column headed "Recreation." It is possible that the valuations returned represent the value of unimproved park sites and that there is no inconsistency in the two tables.

TEXAS.

In the column headed "Public service enterprises" valuations are shown for Abilene, Gonzales, and Wichita Falls, while no receipts or payments on account of public service enterprises are found in Tables 4 and 6. In the case of Abilene the value is that of hydrants and water mains from which the city derives no revenue and the expenses for which are met by private parties. In the case of Gonzales and Wichita Falls the values shown in the table are for cemeteries.

VIRGINIA.

A few cities show no valuations of general government buildings. The offices of the general departments in all probability make use of the county buildings, or, in a few instances, occupy rented quarters.

Bedford City and South Boston reported no valuations under the caption "Protection to person and property." The value of the property of the police and fire departments may be included under "General government," as is frequently the case.

The value of the school property was not reported for Bedford City, Farmville, and Hampton.

South Boston shows the valuation of a water-supply system, but no report was received of receipts or payments on account of the enterprise.

WASHINGTON.

The value of the school property of Hillyard is included in the amount shown for Spokane in the column headed "Schools and libraries."

WEST VIRGINIA.

Three cities do not show valuations under the heading "General government." Two of them are the seats of county government and may make use of county buildings, as is often the case. The same may be true, with one exception, for the four cities which do not show any valuation for jails under the heading "Protection to person and property."

WISCONSIN.

Valuations of markets and scales are shown for Beaver Dam and Oconto in the column headed "Public service enterprises," although neither receipts nor payments on account of such enterprises are shown separately in Table 4 or 6.

WYOMING.

The amounts shown for Casper and Evanston in the column headed "General government" represent the value of office equipment only.

GENERAL TABLES

TABLE 1.—SUMMARY OF RECEIPTS, PAYMENTS, AND CASH BALANCES OF INCORPORATED PLACES HAVING A POPULATION OF 2,500 AND OVER, BY STATES: 1913.

[For a text discussion of this table, see page 390.]

STATE.	Cash balances at beginning of year.	RECEIPTS.			Aggregate of receipts and cash balances at beginning of year.[1]	PAYMENTS.			Cash balances at close of year.
		Total.	Revenue. (Table 3)	Nonrevenue. (Table 8)		Total.	Governmental cost. (Table 5)	Nongovernmental cost. (Table 8)
